

# Shaggy Mane *Coprinus comatus*

**Traits:** cap up to 20 cm long, white, ovoid, shaggy; gills free, white, liquifying and turning to black in a few days; stem, up to 30 cm long, hollow with fragile ring; black spore print

**When:** abundant Sept → Oct

**Where:** on lawn and rich soil, in clusters

**Risks :** confusion with inky cap (*Coprinopsis atramentaria*), not to mix with drinking alcohol; decaying fast
